

Whitepaper: CaesariumX

1. Introduction

In an era where technology is transforming how we exchange value and support causes, CaesariumX (CRX) presents a powerful solution. Built as an ERC-20 token on the Ethereum blockchain, CaesariumX empowers holders to grow their investments while directly supporting global charitable efforts. Our goal is to unite financial opportunity and social impact in a transparent, community-driven ecosystem.

2. Problem Statement

Charities often lack transparency, speed, and the ability to engage modern donors. Meanwhile, many crypto investors struggle to align profit with purpose. There's a gap between financial growth and meaningful contribution - CaesariumX exists to bridge that gap by turning every transaction into a force for good.

3. Our Solution

CaesariumX introduces a token where giving and earning go hand in hand. With a small transaction tax redistributed to a charity wallet and token holders, every trade not only supports global causes but also generates passive income. The community plays an active role in choosing where donations go, ensuring transparency and shared purpose.

4. Tokenomics

Total Supply: 1,000,000,000 CRX

40% (400,000,000) - Public Presale

Allocated for public sale via DxSale.

The amount of tokens added to the liquidity pool will depend on the total funds raised.

Whitepaper: CaesariumX

70% of the raised ETH will be paired with tokens at a listing rate of \$0.00039 to establish liquidity on DEX.

60% - Project Reserve

And will includes all unsold presale tokens.

Reserved for future initiatives such as CEX listings, staking rewards, ecosystem development, marketing, and community incentives.

All usage will be transparently tracked and may be subject to community governance or multi-signature approval.

5. Transaction Tax (1.5%)

Every buy, sell, or transfer of CRX includes a 1.5% tax, distributed as follows:

1% - Charity Wallet

Directly supports causes chosen by community vote.

0.5% - Reflections to Holders

Redistributed among holders as passive income.

Note: Tax structure is adjustable based on project evolution and community feedback.

6. Utility & Governance

Passive Income: Earn more CRX just by holding it.

Charity Voting: CRX holders can vote on which charities receive funds.

Impact Investing: Profit and purpose in one.

Whitepaper: CaesariumX

Community Governance: Plans for proposal voting and protocol upgrades as the project matures.

7. Charity Integration

A core component of CaesariumX is charitable giving. The charity wallet is funded automatically via transaction tax, and CRX holders decide which verified organizations receive donations. Initial focus will be placed on a trusted nonprofit partner with expansion to more causes over time.

8. Security & Transparency

Open-source smart contract.

Public tracking of all charity transactions.

Locked liquidity post-listing.

Multi-sig wallets and/or vesting schedules for team-controlled assets.

9. Conclusion

CaesariumX represents the next generation of investing - one where success means both personal gain and positive global change. Whether you're here to grow your assets or to make a difference, you're part of a movement that rewards both. Join us in reshaping the future of crypto and charity.
